

7. (New) The communication device according to claim 2, further comprising:  
confirming means for confirming whether or not a communication partner has said  
cut-off frequency switching means, in advance of sending and receiving a communication  
data.

8. (New) The communication device according to claim 7, wherein said confirming means is structured such that switching control of said cut-off frequency switching means is carried out in accordance with results of confirmation.

[illegible]
